KEY TAKEAWAYS

Demand for apartment units is booming again. The U.S. economy absorbed 138,000 units in the third guarter of 2024 (the fourth-highest level on record), up from the 133,000 units absorbed in the second quarter (the fifth highest on record). Resurgent international migration trends in recent years, alongside a stout labor market, continue to power some of the best multifamily demand on record.

- **Rent growth is showing signs of reacceleration.** For much of the past year, rent growth has largely moved sideways, hovering in the 1.5% range yearover-year (YOY). But in the last two quarters, we have seen rent growth rise to 2% as resurgent demand is beginning to exert upward pressure.
- New construction continues to pull back. There are 609,000 units currently under construction, down 36% from the peak levels in the first guarter of 2023. Fewer units are breaking ground given the interest rate backdrop and higher overall vacancies. On the other side of this current wave of supply, the stage is set for vacancy to tighten and rents to move meaningfully higher.

STELLAR DEMAND KEEPS VACANCY FLAT IN THE THIRD QUARTER

At the start of this year, the demand side of the equation had its work cut out for it, given the supply boom that was well underway. This year, more than 400,000 units were delivered—the highest of any three-quarter period since 2000. Thus far, rental demand has been able to keep pace, with net absorption reaching over 360,000 units year-to-date (YTD), a 44% increase from 2023's full-year total. This marks the first time since 2020—and only the second time since 2012—that demand improved from the second to the third quarter. As a result, vacancy has remained largely stable at 8.7%, up just 20 basis points (bps) since the end of last year. Stabilized vacancy, which excludes newer assets that haven't had time to lease up, declined by about 10 bps during that same period. If demand growth remains robust and the construction financing market remains challenged, the market may have reached peak vacancy for the cycle.

In about half of the 90 markets tracked by Cushman & Wakefield Research, net absorption is up more than 2.5% YTD compared to last year. Huntsville, AL leads with 9.2% growth in occupied units, followed by Colorado Springs, CO (6.3%), Nashville, TN (6%) and Austin, TX (5.9%). These markets also lead in

LARGEST YOY RENT GROWTH

new deliveries this year—only Nashville falls outside the top five, ranking seventh—showing strong lease-up momentum. The demand is much needed, as Huntsville, Austin and Colorado Springs are among the top five U.S. markets with the highest vacancies, though stabilized vacancies in these markets are generally much lower.

RENT GROWTH CONTINUES TO IMPROVE

Nationally, rent growth improved to 2% YOY in the third quarter, the highest since the first quarter of 2023 when rent growth hit 4%. There is still a way to go for the market to resume a "normal" rent growth trajectory—the YOY rate is about half the 2010-2019 average of just over 4%—but it's a welcome sign given the weaker rent growth observed over the past 12-18 months. At Cushman & Wakefield, we've seen improving lease trade-outs across more than 180,000 units that we manage across the U.S., and it is encouraging to see the broader market catch up to a trend we identified six months ago.

National rent trends have been skewed by the high-profile pullbacks in some pandemic hotspots. Austin, TX, Raleigh, NC, and Phoenix, AZ continue to experience rent corrections (though the pace of declines is moderating), and rent growth in markets like Atlanta, GA, Dallas/Fort Worth, TX, and Central Florida (Tampa and Orlando) has moved sideways. But in most markets, rents are rising. More than half of the tracked markets had rent growth above 3%, and 26 markets posted rent growth of more than 4%. Six markets also posted rent growth above 5%, led by Buffalo, NY (6.7% YOY), followed by Hartford, CT (5.9%), Tulsa, OK (5.4%), Louisville, KY (5.3%), Northern NJ (5.2%) and Richmond, VA (5.1%).

CONSTRUCTION LEVELS ARE PLUMMETING

Declining values, relatively weak (although improving) fundamentals, and high interest rates continue to vex developers and keep new construction starts at bay. As projects deliver, the overall construction pipeline continues to recede, down to just 609,000 units underway today. That's the lowest figure since the onset of the pandemic and is now in line with 2019 levels. The pipeline ballooned to over 950,000 units at the beginning of 2023, but with just 165,000 units starting in 2024, it will continue to dwindle over the next 18-24 months.

The largest pipeline contraction occurred in the three largest Texas markets. Austin, a market of extremes, saw its pipeline recede by more than 25,000 YOY, followed by Dallas/Fort Worth (22,000) and Houston (16,000). Just seven markets saw their pipelines expand by more than 100 units in the third quarter, led by Omaha, NE (1,200), Miami, FL (660), and New Orleans, LA (510).

OUTLOOK

- Improving mortgage rates could start to pull some demand out of the rental market. Data from our property management team is starting to show a potentially nascent trend: More residents are leaving to purchase a condo or house in the wake of the Fed's first rate cut. Renting still holds a significant cost advantage over buying, and demographics remain favorable for renting, but this is something that we will be monitoring very carefully as interest rates come in.
- The recovery curve for fundamentals varies considerably by market. In our latest report on supply risk, we explored the factors driving the multifamily demand surge and how this dynamic interplays with the ongoing wave of new construction. While each market has a different "starting point" in its occupancy recovery, two key factors will shape the pace of recovery: the pullback in construction starts and the demand trajectory for each market. Nashville and Salt Lake City, for example, have seen starts decline by roughly 35% and 75%, respectively, which will help speed up the recovery as demand rebounds.

METHODOLOGY

Cushman & Wakefield's quarterly figures are derived from a variety of data sources, including third-party data sources, and its own proprietary set of managed properties, totaling more than 170,000 units nationally. The market statistics are calculated from CoStar's database, filtering for properties with more than 50 units in the top 90 metros nationally. The figures provided for the current quarter are preliminary, and all information contained in the report is subject to correction of errors and revisions based on additional data received.

EXPLANATION OF TERMS

Total Inventory: The total number of units rented or vacant in a given market.

Overall Vacancy Rate: The number of vacant units expressed as a percentage of total inventory.

Stabilized Vacancy Rate: The number of vacant units in buildings older than 18 months old or that have reached 90% occupancy within 18 months of delivering, expressed as a percentage of total inventory.

Absorption: The net change in occupied units between two points in time.

Overall Asking Rents: Average asking rents weighted by the number of units within a building across all classes.

REGIONAL MAP

A CUSHMAN & WAKEFIELD RESEARCH PUBLICATION

Cushman & Wakefield (NYSE: CWK) is a leading global commercial real estate services firm for property owners and occupiers with approximately 52,000 employees in nearly 400 offices and 60 countries. In 2023, the firm reported revenue of \$9.5 billion across its core services of property, facilities and project management, leasing, capital markets, and valuation and other services. It also receives numerous industry and business accolades for its award-winning culture and commitment to Diversity, Equity and Inclusion (DEI), sustainability and more. For additional information, visit www.cushmanwakefield.com.
